GitHub: https://github.com/Prashant-bro

SUMMARY

Computer Science student with strong academic performance (CPI: 9.01) and hands-on experience in Machine Learning and data analysis. Built real-world ML models for healthcare prediction and stock forecasting. Skilled in Python, SQL, and problem-solving with a focus on data-driven solutions.

SKILLS

Concepts: Machine Learning Algorithms, Feature Engineering, Data Preprocessing

Languages: Python, Java, SQL
Data Science: Pandas, NumPy, Scikit-learn, Data Cleaning
Tools: MySQL, Git, GitHub
Core: Machine Learning, Data Analysis, Problem Solving

PROJECTS

Diabetes Risk Prediction Model

- Developed ML model using healthcare dataset (BRFSS)
- Evaluated using accuracy, precision, and recall metrics
- Tools: Python, Pandas, NumPy, Scikit-learn, MERN Stack
- Live : https://dia-predict-rust.vercel.app/
- Github : https://github.com/Prashant-bro/DiaPredict

AlphaPredict – Stock Price Prediction

- Built Random Forest model for next-day stock prediction
- Improved prediction performance through data preprocessing
- Tools: Python, Pandas, Scikit-learn
- Github : https://github.com/Prashant-bro/Stock-Price-Prediction

---

EDUCATION

B.Tech in Computer Science & Engineering
ITM (SLS) Baroda University, Jarod,Gujarat
CPI: 9.01 | 2nd Year

CERTIFICATIONS

- Introduction to Data Science – Cisco Networking Academy
- Oracle Academy – Database Foundations & Java Fundamentals
